With a *newly-designed* logo and a *new* and improved website *Change for Global Change* is making *new* strides to meet the ever-growing and ever-changing needs of Earth and the eight billion people and countless other species who call this planet “home.”

Now in our sixteenth year, **our goals** have not changed. Our nonprofit exists to **raise awareness** and provide education about living sustainably locally, and to **raise funds** to alleviate global crises, especially lack of potable water.

Another new feature this year is our participation in the *Laudato Si' Project*. We unite with Pope Francis and all Sisters of Saint Joseph around the world – and all people of good will – to make “Care for Our Common Home” a priority.
